

## Installation Notes

### Product Compatibility List

2 February 2012

PrintBoss is shipped ready to interface with several software packages. Each standard interface has at least one check form made to fit the check stock that comes pre-bundled with PrintBoss. Some interfaces include additional forms. PrintBoss is capable of working with more than one Host Accounting Software program simultaneously. All of our standard interfaces are in English.

Also, all of our standard interfaces are 'check at the bottom' of a letter sized page. Our standard check forms place the check at the bottom for two reasons:

- Banks prefer the MICR edge to be the clean edge of the paper (easier for processing by equipment).
- Most of our standard forms provide a mini copy of both the check and advice on the top portion of the page. This very popular option often eliminates the need to make additional copies of checks for record keeping.

The list of our standard interfaces includes the following Windows based products:

#### **PrintBoss Express** - *Checks only; no auto selection of bank account*

Peachtree by Sage  
QuickBooks by Intuit  
Quicken by Intuit (with the exception of 64-bit workstations)  
Simply Accounting by Sage

#### **PrintBoss Select** - *Checks & Deposit Slips; Unlimited bank accounts; Auto selection of bank account*
