

PRINTBOSS BANK KEYS

PrintBoss and PrintBoss Enterprise store a list of the different bank accounts to be used when printing checks. This list also includes different entries for cases when more than one company is using the same bank account or when payroll and payables checks are cut out of the same account for a company.

Initially, PrintBoss and PrintBoss Enterprise allow for 10 entries in the bank list. This covers the majority of our client base needs. However, there are cases when more entries are required. In these cases, a PrintBoss Bank Key may be purchased to allow for additional entries.

Each PrintBoss Bank Key adds 5 more entries to the bank list. Once 80 entries have been acquired, the list automatically becomes unlimited. Multiple PrintBoss Bank Keys may be installed at once. If you know that you will need 80 or more entries in your bank list, you can purchase an unlimited bank key which installs in one simple step to provide unlimited banks to PrintBoss.
